

MATH 1103 - eBook User Information Fall 2010 *updated 081910*

Students who have chosen to use the eBook package that is entirely online need to know where to find the following items all housed in MyStatLab (MSL) Note: MyStatLab and MyMathLab are the same software. Educators frequently refer to the software as MyStatsLab when it is for a statistics course. In general, anything that relates to the textbook package can be found in MSL except the Minitab software.

View the video at <mms://stream.inverhills.edu/math/math1103/eBook MTB.wmv> for a demonstration and explanation if needed.

1. **eBook** is one of the side menu buttons in MSL. Choose the chapter and then the section in the drop-down menu.
2. **Minitab Manual**: from MSL follow the path *Tools for Success* → *Technology Manuals* → *Minitab Manual*
3. **Appendix B data sets** (from the Triola text): The folder containing the Minitab worksheet data sets is one of the items accessed by the *Tools for Success* side menu button when in MSL.
4. **Lecture videos for the text from the publishers**: From within MSL select the side menu button Multimedia Library. Then select the chapter and section in the drop-down menu. Put a check in the boxes of the types of files that you would like to use. You may choose lecture videos or the podcast that can be download to an iPod. Other types of multimedia files are available as well.
5. **Student Solutions Manual**: Select the side menu button *Tools for Success*.
6. **Publisher's Tutor Center**: See the link in the homepage announcements.
7. **Minitab Student14 data set files**: Do one of the following:
 - On campus computers**: From within Minitab, File / Open Worksheet / Look in drop-down menu choose C drive / Program files / Minitab / Minitab 16 / English / Sample Data / and you will see folders for previous versions of Minitab such as version 14, 12, etc.
 - On your own computer**, you should find the student 16 files when you click on "open worksheet" and then "look in" the drop-down menu. To get back to

version 14, click on Minitab in the list and you should see these other data folders. Otherwise, log into MyStatLab and find selected Minitab worksheets in the folder "Course Materials".
